

# Evolution of Maggot Barriers

**Regular** **Super** **New Extreme**

**Regular aka Original** Kept out apple maggot flies from laying eggs under fruit's skin  
Offered little to no protection against codling moth larvae from boring into fruit's flesh to core  
**Extinct: No longer available as of January 2021**

**Super (heavier thread)** Kept out apple maggot flies ... Offered some protection against codling moth larvae  
**Extinct: No longer available as of January 2021**

**New Extreme (heaviest thread with squared-off stitched end)** New and untested, but ...  
Presumed complete protection against apple maggot flies when applied after fruit thinning  
Presumed better protection from codling moth larvae when secured around fruit's stem  
Presumed washable and re-useable  
**Available as of January 2021**

# Protect your Fruit with *Apple Maggot Barriers*

Seattle Tree Fruit Society (STFS), a Chapter of the Western Cascade Fruit Society, offers Maggot Barriers (MBs) as part of our educational mission promoting interest in growing fruit bearing trees, shrubs & vines in urban areas & disseminating pertinent horticultural information to the public.

Past versions of MBs have proven effective against apple maggot damage to fruit.

New Extreme MBs with heaviest thread count & squared-off stitched ends are expected to continue preventing apple maggot damage & also greatly reduce codling moth damage in home orchards of the Puget Sound area when used according to package instructions.

To order Extreme MBs, complete this form. **Become a STFS member & save \$6/pk.**  
Visit [www.seattletreefruitociety.com](http://www.seattletreefruitociety.com) for membership & other information.
