

# Evolution of Maggot Barriers

**Regular**

**Super**

**Extreme**

**Regular aka Original** Kept out apple maggot flies from laying eggs under fruit's skin. Offered little to no protection against codling moth larvae from boring into fruit's flesh to core. **Extinct: No longer available beginning January 2021 to present.**

**Super (heavier thread)** Kept out apple maggot flies ... Offered some protection against codling moth larvae **Extinct: No longer available beginning January 2021 to present.**

**Extreme (heaviest thread with squared-off stitched end)** Excellent protection against apple maggot flies when applied after fruit thinning  
Excellent protection from codling moth larvae when secured around fruit's stem  
More durable for washing and re-using during upcoming years.  
**Available beginning January 2021 and again in 2022**

# Protect your Fruit with *Apple Maggot Barriers*

Seattle Tree Fruit Society (STFS), a Chapter of the Western Cascade Fruit Society, offers Maggot Barriers (MBs) as part of our educational mission promoting interest in growing fruit bearing trees, shrubs & vines in urban areas & disseminating pertinent horticultural information to the public.

Past versions of MBs have proven effective against apple maggot damage to fruit.

New Extreme MBs with heaviest thread count & squared-off stitched ends are expected to continue preventing apple maggot damage & also greatly reduce codling moth damage in home orchards of the Puget Sound area when used according to package instructions.

To order Extreme MBs, complete this form. **Become a STFS member & save \$6/pk.**  
Visit [www.seattletreefruitociety.com](http://www.seattletreefruitociety.com) for membership & other information.
